Genes that fit *your* farm.

AAC Foray VB Canada Prairie Spring Red Wheat

Progress Through Research
Le progrès grâce à la recherche

Description:

AAC Foray VB is a very high yielding CPS wheat with strong straw, improved protein content and good disease resistance. AAC Foray VB has a good disease package and is resistant to leaf rust, moderate resistance to stem rust and intermediate resistance to bunt and FHB. AAC Penhold is the refuge in AAC Foray VB for added straw strength. AAC Foray VB should be an exceptional fit for all CPS growing areas especially those areas prone to the orange wheat blossom midge.

Parentage: CPS03hnF4 5123.032/5701PR

Strengths:

- Grain yield 108% of 5701PR and 119% of 5700PR (average of all sites in 2010 to 2012 High Yield Wheat Registration trials)
- Very large kernel with heavy kernel weight
- Early maturing, 1 day earlier than 5700PR
- Improved protein over 5700PR and 5701PR
- Good sprouting tolerance
- Resistant to leaf rust

Neutral Traits:

- Moderate resistance to stem rust
- Intermediate resistance to Bunt and FHB
- Slightly taller than 5700PR and 5701PR

Weaknesses:

- Slightly weaker straw strength than 5700PR more similar to 5701PR
- Moderately susceptible to leaf spots and smut
