

# BARRON R2X

2250 HU, 000.8 RM

TECHNICAL BULLETIN

## COUNT ON

<input type="checkbox"/>	Yield:	94%
<input type="checkbox"/>	Phytophthora Gene:	No
<input type="checkbox"/>	Phytophthora Field Tolerance Rating :	Not available
<input type="checkbox"/>	Sclerotinia Resistance Rating	Below average
<input type="checkbox"/>	Iron Chlorosis Rating:	Susceptible
<input type="checkbox"/>	Cyst Nematode Gene:	No

## COMMENTS

Barron R2X is an aggressive plant as a seedling which makes it better suited to zero till situations compared to other varieties. Barron R2X is SeCan's earliest maturing soybean.

- Dicamba resistant for tough - to - control weeds like kochia, cleavers, wild buckwheat and ragweed
- Tall branchy plant for great competition against weeds
- 1 day earlier than NSC Reston RR2Y

### 2018 Saskatchewan Soybean Regional Variety Trial Results\*

Variety	Type	Maturity Grouping	Yield Results % of check	Relative Days to Maturity
TH 33003R2Y	RR2Y	00.3	100	115
McLeod R2	RR2Y	00.3	103	116
Mahony R2	RR2Y	00.3	107	116
Bishop R2	RR2Y	00.2	98	113
Foote R2	RR2Y	00.5	104	118
<b>Barron R2X</b>	<b>Xtend</b>	<b>000.8</b>	<b>94</b>	<b>111</b>

\*Information in table is taken from Sask Seed Guide 2018. Yield results are based on 2015-2017 results (some varieties may only have one year of data)

2018 Seed Manitoba – Western MB Roundup Ready® Soybean Comparison (2017 Data)
